리

A detailed diagram of the sliding door assembly. The door is a large, light-yellow rectangular panel. It is mounted on a track system. At the top, there are two rollers (1) mounted on a bracket (2), which is secured to the track (3). The track is a long, narrow metal rail. At the bottom, there is a small component (5) that fits into a slot in the door's frame. On the left side, there is a handle (4) and a lock mechanism (7) that fits into a slot in the door's frame.
